### **STATEMENT:**

I believe Alaska is the most unique state in the Country. It is also the richest state in the Country, with both beauty and revenues, but we're always hearing that we don't have enough money to keep the roads plowed or keep the parks open etc. The problem is the Government is spending too much of "our" money. The best way to solve that is to reduce the size of Government. The less Government the better.

Our children are the future of this state so we need incentives to keep them here instead of moving out of state. Our schools need to be the best we can afford so that our kids get a quality education.

I believe in traditional family values. If you don't have any values, you don't have anything.

The permanent fund was founded to share the wealth that the state had, more than 20 years ago. It is more important now than it ever was. It boosts the economy of the whole state. I will do everything in my power to defend the permanent fund.

I support subsistence rights, and also our right to keep and bear arms, without question.

With the right kind of leadership we will have a brighter future not just for ourselves but for our children and our children's children.

I would consider it an **Honor** and a **Privilege** to serve the people of my district.
